# IMPERIAL/REGAL PREP-PROCEDURE/TREATMENT CENTERS

**COMBINE COMPONENTS TO CREATE A WORKSTATIONS  
DESIGNED TO MEET ALL YOUR NEEDS**

**To give** your work areas a fully-coordinated, professional appearance, simply combine a grouping of our Treatment and Prep-Procedure Tables into a highly-functional Prep-Procedure/Treatment Center.

There are a multitude of ways that you can create a Prep-Procedure/Treatment Center. Any Center you create is designed to be free-standing and accessible from three sides of each station, allowing it to be positioned anywhere in the room.

A single-station is a single Prep-Procedure or Treatment Table. For more flexibility create a two-station by abutting two tables together, or add a Base Cabinet between them to create more storage. You can even add a sink and faucet to the base cabinet.

Mount a Counter Top Chase above the base cabinet to conceal electric, water, oxygen and vacuum lines. You can attach an extra cabinet or cabinets, or mount diagnostic equipment and lights to the chase.

Or choose a Full-Height Chase to create a Center with one to four stations.

Then choose either Imperial laminated components or, for the ultimate in durability, choose our all-stainless steel Regal components.

Prep-Procedure/Treatment Centers can be configured with any the following components found within this catalog:

#### **Prep-Procedure/Treatment Center**

Prep-Procedure Table(s)  
Faucet and Drains  
Treatment Table(s)

#### **Countertop Chase Prep-Procedure/Treatment Center**

Prep-Procedure Table(s)  
Faucet and Drains  
Treatment Table(s)  
Countertop Chase  
Countertop  
Base Cabinet

#### **Full-Height Chase Prep-Procedure/Treatment Center**

Prep-Procedure Table(s)  
Faucet and Drains  
Treatment Table(s)  
Full-height Chase

## Prep-Procedure/Treatment Centers

On this page and some of the following pages, there are ideas of how to configure Prep-Procedure/Treatment Centers using SSCI's Modular Cabinetry, Base Cabinetry, Counter Top Chase, Full-Height Chase and Prep-Procedure and Treatment Tables. Look over these ideas, if one does not suit your facility, then our design team will work with you to configure the perfect Prep-Procedure/Treatment Center for your facility.

## Counter Top Chase Prep Procedure/Treatment Centers

**In-Line-Arrangement, 1-Station**

**In-Line-Arrangement, 2-Station**

## Full-Height Chase Prep Procedure/Treatment Centers

**In-Line-Arrangement, 1-station**

**In-Line-Arrangement, 2-Station**

**L-Arrangement, 2station**

**T-Arrangement, 3-Station**

**✚-Arrangement, 4-Station**

# Imperial/Regal Chases

## IMPERIAL/REGAL COUNTER TOP CHASES ARE USED WITH IN-LINE AND CABINET ARRANGEMENT PREP-PROCEDURE/TREATMENT CENTERS:

Add a Countertop Chase to your In-line configured Prep-Procedure/Treatment Center or Cabinet Arrangement Prep-Procedure/Treatment Center for a convenient place to conceal electricity, oxygen, water and vacuum lines, making them readily available to each station within the Pre-Procedure/Treatment Center. Upper Cabinets can be mounted into an optional cabinet opening or surface-mounted to the Chase's exterior for even more flexibility and storage.

Counter Top Chases used with In-line Prep-Procedure/Treatment Centers require a Base Cabinet and counter top or Chases used with Cabinet Arrangements require SSCI's Modular Cabinetry (Section 18) to support the chase.

The Counter Top Chase consists of a column and adjustable collar, to accommodate various ceiling heights, and are shipped unassembled (four panels each) to reduce your shipping costs and for easier handling.

**New Product  
Check with SSCI  
for Picture**

### Collar

Available in 6 heights from 12-in. (30.48cm) to 54-in. (137.16cm) in 9-in. (22.86cm) increments to accommodate various height ceilings

### Cabinet Opening

An Upper Cabinet Opening is optional in the Panel 1 for a recessed cabinet. Chase can be rotated to change cabinet location.

### Column

57-in. high

Each of the four Panel's exterior and interior surfaces and edges are high-pressure plastic laminate.

Surface Mount:

- Diagnostic equipment
- Lights
- Cabinet
- Electrical outlet
- Oxygen supply
- Vacuum outlet

**Imperial Laminated Counter  
Top Chase on Base Cabinet**

## IMPERIAL/REGAL COUNTER TOP CHASE FEATURE THESE CONSTRUCTION DETAILS AND MATERIALS:

**Imperial** Chase are constructed of industrial-grade substrate and are machined on a CNC machine for accuracy. Chase Panels are mechanically-fastened to ensure a solid, sturdy chase. This type of construction allows for panel removal for future utility additions.

All chase interiors are finished with Thermo-Fused Melamine, making them water, odor and chemical-resistant.

All finished, exterior surfaces including the chase's edges are laminated with high-pressure plastic laminate, available in SSCI Standard colors, or SSCI optional colors or choose from a spectrum of customer-selected colors to blend with your décor.

**Regal** Chase panels are constructed of die-formed stainless steel, and are formed on a CNC machine for accuracy. Panels are engineered for tight-fitting joints. Joints are mechanically-fastened to ensure a solid, sturdy chase. This type of construction allows for panel removal for future utility additions.

All chase interiors are stainless steel, making them impervious to water and absorption of odors.

All stainless steel exterior is durable and easy to clean, satin finish.

## Countertop Chase Configurations

Choose whether you want a plain column or a cabinet opening in one panel. Column can be rotated to change cabinet's location. Then, select the appropriate chase height for your facility's ceiling height. The collar will adjust from the low to high range of the Ceiling Height selected.

**Important:** These customer order requirements, in addition to other customer order requirements, must be satisfied prior to the beginning of manufacturing lead time:  
†Specify 4-digit Color code. See Color Selections, Section A, pages 1 & 2 for Color Codes.

SSCI laminated products are available in SSCI standard laminates, SSCI optional laminates, or Customer selected laminates.

# Imperial/Regal Base Cabinets for Prep-Procedure/Treatment Centers

## IMPERIAL/REGAL CABINETRY FEATURES THESE HIGH-QUALITY CONSTRUCTION DETAILS AND MATERIALS:

**Imperial** Base and Upper Cabinet body panels are constructed of 45-lb. industrial-grade substrate, panels are machined on a CNC machine for accuracy. Panels are dadoed and rabbeted for tight-fitting joints. Joints are glued with adhesive impervious to liquids and mechanically-fastened to ensure a solid, sturdy cabinet.

All cabinet interiors are finished with Thermo-Fused Melamine, making them water, odor and chemical-resistant.

Drawer's steel sides feature integrated roller slides with baked-on, white epoxy finish. Drawer's back/bottom are .625-in. thick; open/close easily with 100 lb. load. 3D micro-adjustment ensures drawer alignment.

Door's positive-action, invisible hinges have self-closing mechanism, also holds door open. 3D micro-adjustment ensures door alignment.

Doors and drawer fronts have full width Aluminum Pulls.

All finished, exterior surfaces including the body's edges, drawer and cupboard door edges are laminated with high-pressure plastic laminate, available in SSCI Standard colors, or SSCI optional colors or choose from a spectrum of customer-selected colors to blend with your décor.

**Regal** Base and Upper Cabinet body panels are constructed of die-formed stainless steel, panels are formed on a CNC machine for accuracy. Panels are engineered for tight-fitting joints. Joints are welded and mechanically-fastened to ensure a solid, sturdy cabinet.

All cabinet interiors are stainless steel, making them impervious to water and absorbing odors.

Drawer's front is double-wall stainless steel construction with a full-width pull incorporated into the design. Welded, one-piece drawer body is stainless steel with roller telescoping slides allow drawers to fully open/close easily with 100 lb. load.

Doors are double-wall stainless steel construction with a full-width pull incorporated into the design and features positive-action invisible hinges which have self-closing mechanism, also holds door open. 3D micro-adjustment ensures door alignment.

Doors and drawer fronts have full width Stainless Steel Pulls.

All stainless steel exterior/interior is durable and easy to clean, satin finish.

# Countertops For Imperial/Regal Base Cabinets

Imperial Counter top for Base Cabinet

## Countertop

Countertop designed for use with base cabinets that fit between two stations in In-Line Prep-Procedure/Treatment Centers,. The surface and all four edges are finished with high-pressure plastic laminate. The adjoining tables' counter tops abut against the edges of the base cabinet counter top. A stainless steel counter top is offered to match the stainless steel tops of abutted tables.

P/N	DESCRIPTION	DIMENSIONS

# Laminated/Stainless Steel Chases

## IMPERIAL/REGAL FULL-HEIGHT CHASES ARE USED WITH IN-LINE L, T OR + PREP-PROCEDURE/TREATMENT CENTERS:

A Full-height Chase allows you to create an In-line, L, T or + configured Prep-Procedure/Treatment Center for a convenient place to conceal electricity, oxygen, water and vacuum lines, making them readily available to each station within the Pre-Procedure/Treatment Center. Lower and Upper Cabinets can be mounted into optional cabinet openings or upper cabinets can be surface-mounted to the Chase's exterior for even more flexibility and storage.

The Full-Height Chase consists of a column and adjustable collar, to accommodate various ceiling heights, and are shipped unassembled (four panels each) to reduce your shipping costs and for easier handling.

### Column

93-in. high

Each of the four Panel's exterior and interior surfaces and edges are finished with high-pressure laminate.

### Surface-Mount:

- Diagnostic equipment
- Lights
- Cabinet
- Electrical outlet
- Oxygen supply
- Vacuum outlet

### Collar

Available in 6 heights from 12-in. (30.48cm) to 54-in. (137.16cm) in 9-in. (22.86cm) increments to accommodate various height ceilings

### Cabinet Openings

Lower and Upper Cabinet Openings are optional in various combinations for recessed cabinets.

Imperial Laminated Full-Height Chase

**New Product  
Check with SSCI  
for Picture**

**Regal Stainless Steel  
Full-Height Chase**

# How to Order Imperial/Regal Full-Height Chase

## IMPERIAL/REGAL FULL-HEIGHT CHASE FEATURE THESE CONSTRUCTION DETAILS AND MATERIALS:

**Imperial** Chase are constructed of industrial-grade substrate and are machined on a CNC machine for accuracy. Chase Panels are mechanically-fastened to ensure a solid, sturdy chase. This type of construction allows for panel removal for future utility additions.

All chase interiors are finished with Thermo-Fused Melamine, making them water, odor and chemical-resistant.

All finished, exterior surfaces including the chase's edges are laminated with high-pressure plastic laminate, available in SSCI Standard colors, or SSCI optional colors or choose from a spectrum of customer-selected colors to blend with your décor.

**Regal** Chase panels are constructed of die-formed stainless steel, and are formed on a CNC machine for accuracy. Panels are engineered for tight-fitting joints. Joints are mechanically-fastened to ensure a solid, sturdy chase. This type of construction allows for panel removal for future utility additions.

All chase interiors are stainless steel, making them impervious to water and absorption of odors.

All stainless steel exterior is durable and easy to clean, satin finish.

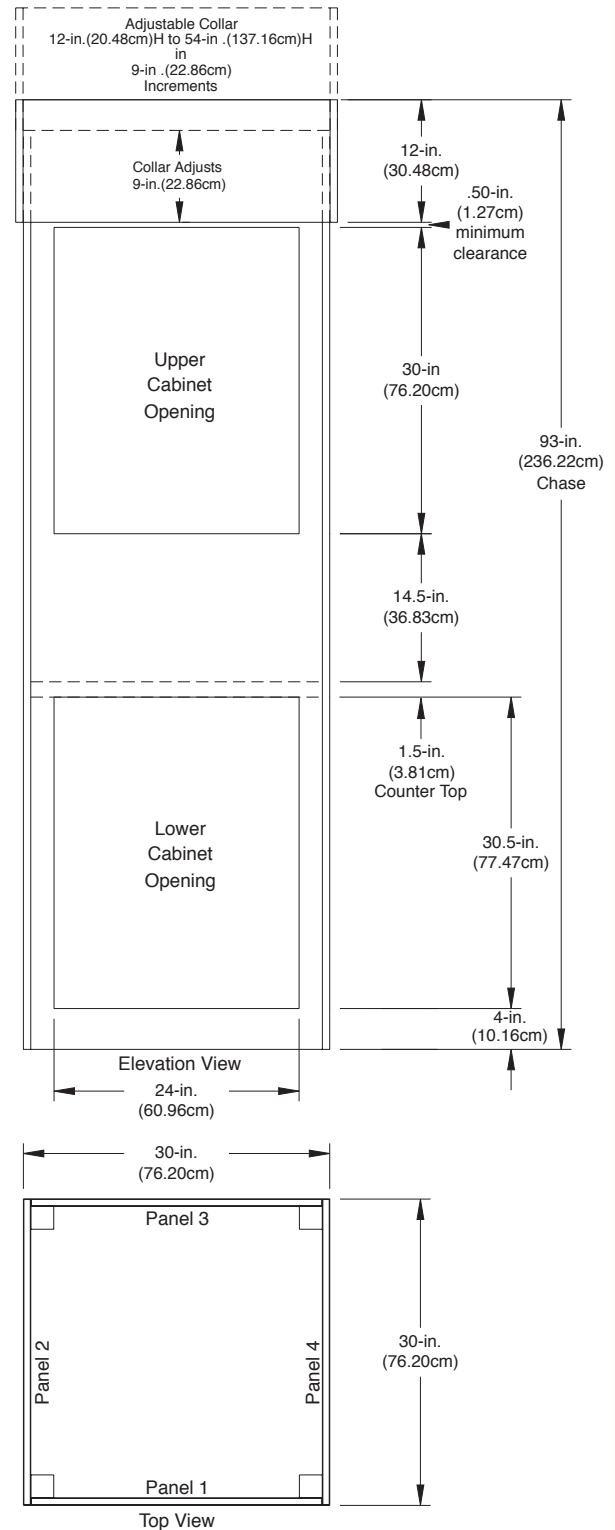

The Full-Height Chase stands on the floor and extends to the facility's ceiling. Use the chart on the next page to select the appropriate height chase. There are six heights available for ceiling heights from 7-ft. 9-in. (2.36m) thru 12-ft. 3-in. (3.73m)

Choose the type of material you want the chase to be; Imperial Laminated or Regal Stainless Steel.

The Chase is available with four panels plain; no cutouts for cabinets. Or, various cabinet cutout combinations can be specified. The following rules apply:

- 1) Only one panel of the chase can be cut out for a lower cabinet. You cannot place a table on the panel with a lower cabinet cutout.
- 2) The chase can be cut out for one upper cabinet on any panel. If two upper cabinet cutouts are preferred, they must be on opposing panels of the chase.
- 3) Upper cabinets can be surface-mounted on any panel in any combination; no cabinet cutouts are required.

'Panel One' is determined by where you will abut your first table. To decide where you will install cabinets in the chase, face 'Panel One'. The left panel is 'Panel Two', the back panel is 'Panel Three' and the right panel is 'Panel Four'.

# Configurations For Full-Height Chase Prep-Procedure/Treatment Centers

## USE OF PREP-PROCEDURE AND TREATMENT TABLES WITH THE FULL-HEIGHT CHASE

The illustrations below show the possible configurations using a Full-Height Chase. Panel One is identified in each drawing.

The solid line for each table depicts a Prep-Procedure Table with an abutted top or a Treatment Table, the dotted line depicts a Prep-Procedure Table with no top.

The dimensions included with the illustrations define the width and depth of each configuration using the Full-Height

Chase. The small dimension is based on the use of: 48-in. (121.92cm) table(s) with abutted top.

The larger dimension is based on the use of: 60-in. (152.40cm) table(s) with abutted top.

If you plan to use one 48-in. (121.92cm) table with abutted top instead of one 60-in. (152.40cm) table with abutted top, simply subtract 12-in. (30.48cm) from the larger W dimension.

**In-Line, 1-Station**

**In-Line, 2-Station**

**T, 3-Station**

**L, 2-Station**

**+, 4-Station**

# Cabinet Cutouts Locations For Imperial/Regal Full-Height Chase

**TO COMPLETE THE FULL-HEIGHT CHASE SPECIFICATIONS, CHOOSE CHASE HEIGHT AND CABINET CUTOUT LOCATIONS:**

## Full-Height Chase

Select the appropriate chase height for your facility's ceiling height. The collar will adjust from the low to high range of the Ceiling Height selected.

P/N IMPERIAL LAMINATED	P/N REGAL STAINLESS STEEL	WIDE	CEILING HEIGHTS		DEEP
			LOW	HIGH

## Cabinet Cutout Location Code

Refer to the drawings on the opposite page to determine which panel, *Panel One* is.

The Chase is available with four panels no cutouts for cabinets. Or, various cabinet cutout combinations can be specified. *The following rules apply:*

- 1) Only one panel can be cut out for a lower cabinet. You cannot place a table on the panel with a lower cabinet cutout.
- 2) One upper cabinet cutout can be in any panel. If two upper cabinet cutouts are preferred, they must be on opposing panels.
- 3) Upper cabinets can be surface-mounted on any panel in any combination; no cabinet cutouts are required.

*Specify a Location Code for all four panels of the chase; Panel One, position 4, Panel Two, position 5, Panel Three, position 6 and Panel Four, position 7.*

LOCATION CODE	LOCATIONS
<b>Panel One; first table is abutted to</b>

# Imperial/Regal Lower Cabinets for Full-Height Chase

## IMPERIAL/REGAL CABINETRY FEATURES THESE HIGH-QUALITY CONSTRUCTION DETAILS AND MATERIALS:

**Imperial** Lower and Upper Cabinet body panels are constructed of 45-lb. industrial-grade substrate, panels are machined on a CNC machine for accuracy. Panels are dadoed and rabbetted for tight-fitting joints. Joints are glued with adhesive impervious to liquids and mechanically-fastened to ensure a solid, sturdy cabinet.

All cabinet interiors are finished with Thermo-Fused Melamine, making them water, odor and chemical-resistant.

Drawer's steel sides feature integrated roller slides with baked-on, white epoxy finish. Drawer's back/bottom are .625-in. thick; open/close easily with 100 lb. load. 3D micro-adjustment ensures drawer alignment.

Door's positive-action, invisible hinges have self-closing mechanism, also holds door open. 3D micro-adjustment ensures door alignment.

Doors and drawer fronts have full width Aluminum Pulls.

All finished, exterior surfaces including the body's edges, drawer and cupboard door edges are laminated with high-pressure plastic laminate, available in SSCI Standard colors, or SSCI optional colors or choose from a spectrum of customer-selected colors to blend with your décor.

**Regal** Lower and Upper Cabinet body panels are constructed of die-formed stainless steel, panels are formed on a CNC machine for accuracy. Panels are engineered for tight-fitting joints. Joints are welded and mechanically-fastened to ensure a solid, sturdy cabinet.

All cabinet interiors are stainless steel, making them impervious to water and absorbing odors.

Drawer's front is double-wall stainless steel construction with a full-width pull incorporated into the design. Welded, one-piece drawer body is stainless steel with roller telescoping slides allow drawers to fully open/close easily with 100 lb. load.

Doors are double-wall stainless steel construction with a full-width pull incorporated into the design and features positive-action invisible hinges which have self-closing mechanism, also holds door open. 3D micro-adjustment ensures door alignment.

Doors and drawer fronts have full width Stainless Steel Pulls.

All stainless steel exterior/interior is durable and easy to clean, satin finish.

# Design Service For Prep-Procedure/Treatment Center

## THE PERFECT IMPERIAL MODULAR CABINET ARRANGEMENT IS JUST A PHONE CALL AWAY

SSCI's Design Service is offered to customers after discussing and agreeing on a viable project with an SSCI Representative. After a methodical review of the customer's needs for their facility, the SSCI Representative will present the project to our staff of designers to create a set of approval drawings. The drawings ensure that SSCI will

build exactly what the customer has discussed with the SSCI Representative. Once the customer has committed to purchase from SSCI and, if the drawings require revisions, the Final Approval Drawings will be created and presented to the customer for their approval. Other Customer Requirements may be required before manufacturing time can begin.

### CREATING THE PERFECT PREP-PROCEDURE TREATMENT CENTER TAKES JUST 5 EASY STEPS:

- 1 Measure your space.**  
Obtain overall width, height and depth of the available space in your facility where you plan to place your Prep-Procedure/Treatment Center. Be sure to allow sufficient room at the end of all of the tables in the Center to work or permit gurney or equipment to clear.
- 2 Choose the configuration of your Prep-Procedure/Treatment Center.**  
1-Station, inline configuration,  
2-Station, inline or 'L' configurations,  
3-Station, 'T' configuration,  
4-Station, '+' configuration
- 3 Specify the Tables.**  
Prep-Procedure and Treatment Tables are available in 2 sizes, in a various drawer/door combinations. See Sections 10 and 11 for complete specifications.
- 4 Determine the position of any cabinet cutouts you require.**  
Countertop Chase is either none or one cutout. Full-Height Chase has many combinations, see Full-Height Chase Cutout Locations Chart, see Section 12.
- 5 Choose the cabinets for your Chase.**  
Countertop Chases; specify a Base Cabinet/Countertop and optional Upper Cabinet. Full-Height Chase; specify optional Lower and Upper Cabinets.
- 6 Choose the laminate for your Imperial Prep-Procedure/Treatment Center**  
All SSCI Laminated Products are available in SSCI standard laminates, SSCI optional laminates, or customer-selected laminates. See the Laminate Options pages in the Introductory Section.

Let us help you give your facility the professional appearance you deserve. An SSCI Representative will help you select configuration, tables, chase and sizes, laminate and countertop surfaces of your Prep-Procedure/Treatment Center to meet your unique needs, space requirements and budget.

Let SSCI assist your architect and to help plan the perfect facility.

It all starts with a phone call to discuss your requirements. Then we will create a CAD-generated

drawing of your center, complete with faucets and drain selection.

Our team of experienced designers will work with your measurements, work center type, style and budget to create the perfect Prep-Procedure/Treatment Center for your requirements.

### FOR EVERY PREP-PROCEDURE/TREATMENT CENTER PURCHASE SSCI CREATES A DRAWING TO ENSURE CUSTOMER'S SATISFACTION

SSCI creates an Approval Drawing for each Prep-Procedure/Treatment Center ordered. These detailed drawings of your Prep-Procedure/Treatment Center list chase, chases's cabinets and tables. Sizes, quantities and laminate choice\* are also listed and illustrate how the center is to be assembled. If you choose to alter the positions of the tables or cabinets in the center or your choice of laminate\*, do not sign the existing Approval Drawing. Contact your SSCI representative, so that a new Approval Drawing can be created.

All laminated and stainless steel Prep-Procedure/Treatment Center are non-stocked, made specifically per your specifications. Once SSCI has received the signed Approval Drawing the order is non-cancelable.

In addition to other customer order requirements, the Final Approval Drawings must be signed and received by SSCI prior to the beginning of manufacturing lead time.

\*Not applicable for Regal stainless steel products

## Design Service For Prep-Procedure/Treatment Center

**SSCI DESIGNS ALL OF OUR CABINET AND TABLE PRODUCT LINES TO ALLOW INTEGRATION OF THE VARIOUS COMPONENTS FOR A VIRTUALLY ENDLESS NUMBER OF CONFIGURATIONS. OUR DESIGN STAFF CAN ASSIST YOU OR YOUR ARCHITECT.**

**Cabinet Arrangement with  
Recessed End Treatment Table  
Abutted to Front Edge of Countertop**

**Let** our design staff create a Prep-Procedure/Treatment Center integrated with our Modular Cabinetry. Using our standard tables and cabinets from this catalog, we can put together a variety of Prep-Procedure/Treatment/Storage options for your space.

Whether you're looking for a Prep-Procedure/Treatment Center with or without a Countertop Chase, or want to combine an Treatment or Prep-Procedure Table with Custom Cabinetry as shown here, SSCI can help. See Section 19, Undercounter Standard-Height Cabinets for cabinet selection and Sections 10 and 11 for Treatment and Prep-Procedure Tables selection.

Contact your SSCI Representative for to discuss the possibilities.
