IMPERIAL MODULAR CABINETRY

YOU CAN TRUST SSCI TO OFFER PROFESSIONAL QUALITY CABINETRY IN THE WIDEST RANGE OF STYLES, SIZES AND FINISHES YOU'LL FIND!

Professionalism is an important aspect of any veterinary business. Your clients depend on it. The success of your business requires it. Just imagine how professional your business will look when you take the time to outfit each room with coordinated modular cabinetry designed to meet your individual exam, treatment and storage requirements.

You can do just that with help from SSCI. We offer a complete selection of cabinets in a wide range of sizes and styles and virtually any laminated color you desire. With such a large selection, it's easy to perfectly outfit each area within your facility.

All our Cabinetry features our top-quality construction details: Self-

closing drawers with integrated metal drawer sides and slides; adjustable shelves; and a choice of two standard cabinet handles to suit your style.

Most cabinets are available in a selection of widths that increase in 3-in. (7.62cm) increments to allow you to build a bank of cabinets to fit your rooms. We also offer a full collection of end panels, filler strips and countertops to give your cabinetry a finished appearance.

The cabinets on the following page are the types we can provide to make your facility one-of-a-kind. Be sure to call your SSCI representative for help designing and ordering the ideal cabinetry for your needs.

Choose from four basic cabinet types:

Each of the four cabinet types shown on this page are available in many styles. Various combinations of open cupboard and doors/drawers styles are offered on the pages that follow.

• Imperial Upper Cabinets

Choose open cupboards with no doors, cupboards with sliding or hinged doors. All have adjustable shelves to meet your needs. We even offer pass-thru cupboards to pass materials between two rooms.

Open Cabinet

**3-Drawer
Undercounter
Cabinet**

• Imperial Wall-Mount Undercounter Cabinets

Designed to mount on the wall at the right height for the job while leaving the floor clear underneath. Allows for ample storage with easy clean-up. Choose from open cabinets, or those with drawers or hinged doors. Specially designed desk drawer or keyboard drawer cabinets are available for convenience.

**Undercounter 1 Drawer,
1 Door Hinged Cabinet**

• Imperial Full Height Cabinets

A wide variety of cupboards featuring one vertical cupboard or two vertical cupboards in three different combinations give you incredible storage possibilities.

**1 Door Hinged
over 1 Door
Hinged**

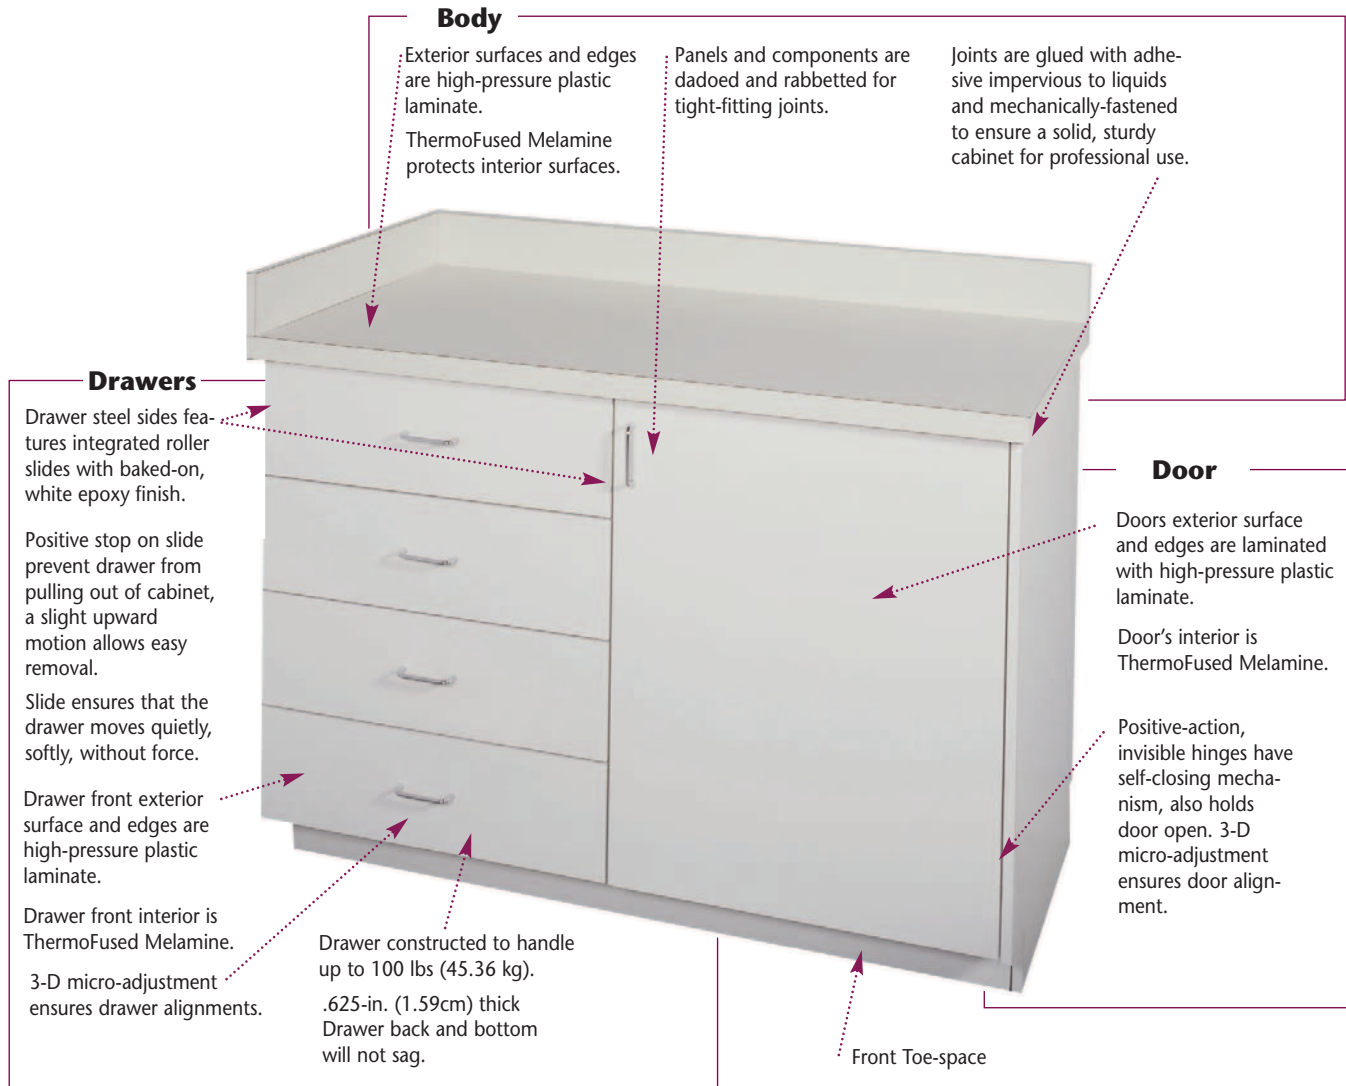

1 Door Hinged

• Imperial Undercounter Cabinets

Available in three heights for reception, standard and exam. A huge selection of drawer/cupboard combinations gives you a place to store everything from client files to treatment supplies.

Imperial Modular Cabinetry

IMPERIAL LAMINATED CABINET PREP-PROCEDURE TABLES INCLUDE THESE FEATURES:

Imperial Prep-Procedure Table body panels are constructed of 45-lb. industrial-grade substrate, panels are machined on a CNC machine for accuracy. Panels are dadoed and rabbetted for tight-fitting joints. Joints are glued with adhesive impervious to liquids and mechanically-fastened to ensure a solid, sturdy cabinet.

All cabinet interiors are finished with Thermo-Fused Melamine, making them water, odor and chemical-resistant.

Drawer's steel sides feature integrated roller slides with baked-on, white epoxy finish. Drawer's back/bottom are .625-in. thick; open/close easily with 100 lb. load. 3D micro-adjustment ensures drawer alignment.

Door's positive-action, invisible hinges have self-closing mechanism, also holds door open. 3D micro-adjustment ensures door alignment.

Choose No Pulls, Chrome Wire Pulls or Full-Width Aluminum Pulls for doors and drawer fronts.

All finished, exterior surfaces including the body's edges, drawer and cupboard door edges are laminated with high-pressure plastic laminate, available in SSCI Standard colors, or SSCI optional colors or choose from a spectrum of customer-selected colors to blend with your décor.

SPECIFY OPTIONS

When discussing your Imperial Modular Cabinetry with SSCI's representatives, be sure to select any of the options below that you would like incorporated into your cabinets.

Specify a Towel Drop for most Cabinet Doors:

A convenient 6-in. wide x 6-in. high (15.24cm x 15.24cm) Towel Drop may be added to most Cabinet Doors. Towel Drops may be specified in cabinet doors: hinged left, hinged right and the left or right panel of pairs of doors.

Specify a Privacy Key Lock for a Cabinet:

Locks are designed for privacy, not security.

Choose one of the options below:

For each Cabinet:

- One lock if all drawers.
- One lock if door(s).
- One lock for each tier of door(s).
- Two locks; drawer above door(s).

SPECIFY THE WIDTH OF EACH CABINET:

To help you design your cabinetry for a custom fit in your space, all our Cabinets (except Corner Cabinets) are available in 11 different widths, increasing in 3-in. (7.62cm) increments. To specify the width of each Cabinet, you must add the Width Dimension Code to the Product Number. Refer to the dimension chart for the correct code needed to complete the Product Number for each cabinet you order.

You must select a cabinet width to complete the Product Number for each Cabinet you order. Simply place the appropriate 2-digit Width Code for the width you prefer (see chart at right) into the 10th and 11th digits in the cabinet Product number.

Width Dimension Chart

P/N CODE	WIDTH	
	In.	Cm
BV	12	30.48
CH	15	38.10
CT	18	45.72
DF	21	53.34
DR	24	60.96
ED	27	68.58
EP	30	76.20
FB	33	83.82
FN	36	91.44
FZ	39	99.06
GL	42	106.68

SPECIFY A PULL STYLE:

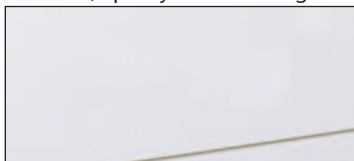

All Imperial Modular Cabinets may be ordered with no drawer/door pulls or with Chrome Wire Pulls or Full-Width Aluminum Pulls. Full-Width Aluminum Pulls protect the edges of drawers and doors.

Order No Pulls if you wish to add separately-purchased pulls to the cabinet's drawers and doors. this option allows for

customer-selected decorating consistency throughout your facility.

You must select one of these options to complete the Product Number for each Cabinet you order. Simply place the appropriate letter for the pull style you prefer (see below) into the 9th digit in the cabinet Product number.

No Pulls, specify 'A' in 9th digit

No Pulls

Chrome Wire Pulls, specify 'B' in 9th digit

Chrome wire Pulls

Full-width Aluminum Pulls, specify 'C' in 9th digit

Full-width Aluminum Pulls

Laminates For Imperial Modular Cabinetry

CHOOSE A LAMINATE:

A Spectrum of Colors and Finishes

SSCI Laminated Products are available in virtually all commercially-available high-pressure laminates. Most laminates are available in a spectrum of colors and finishes to match or coordinate any décor. We'll will make any of our laminated products in any of these available laminates. We want to be your supplier for the color-coordinated equipment and furnishings you need to give your facility the greatest client appeal.

SSCI's Standard Laminates and SSCI Optional Laminates are shown here. However keep in mind, we can build your laminated products in virtually any laminate available.

The SSCI Standard Colors listed below are included in the selling price of the product. Manufacturing Lead Time is also based on SSCI Standard Colors. SSCI Optional Colors (Price Levels 1 and 2) are available at a additional charge, but SSCI will adhere to the standard Manufacturing Lead Times for the products chosen.

Optional Laminates may become discontinued from time-to-time and SSCI retains the right to change the Optional Laminate selection when necessary.

Customer-selected laminates may fall into the category of Price Levels 1 or 2 or higher, depending on market price. Manufacturing lead times for laminated products made with customer-selected laminates may vary.

SSCI laminated products are available in SSCI standard laminates, SSCI optional laminates, or Customer selected laminates.

Look for this Color Wheel on pages where laminate needs to be specified (_ _ _ †).

Standard Laminates

COLOR NAME	SSCI NUMBER	MANUFACTURER/NUMBER
Almond	A001 [†]	Wilson Art/D30-60 Matte
Designer White	D001 [†]	Wilson Art/D354-60 Matte
Fashion Grey	F002 [†]	Wilson Art/D381-60 Matte

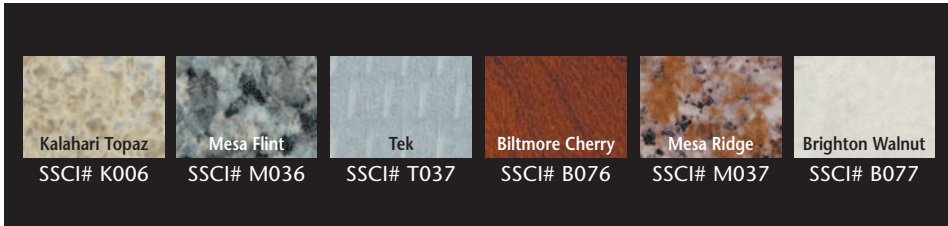

Important: These customer order requirements, in addition to other customer order requirements, must be satisfied prior to the beginning of manufacturing lead time:
[†]Specify 4-digit Code to select Laminate/Color. See this Section, pages 5 & 6 for Laminate/Color Codes.

Optional Laminates: Price Level 1 - increase over SSCI Standard laminates

Design Service For Imperial Modular Cabinetry

THE PERFECT IMPERIAL MODULAR CABINET ARRANGEMENT IS JUST A PHONE CALL AWAY

SSCI's Design Service is offered to customers after discussing and agreeing on a viable project with an SSCI Representative. After a methodical review of the customer's needs for their facility, the SSCI Representative will present the project to our staff of designers to create a set of approval drawings. The drawings ensure that SSCI will

build exactly what the customer has discussed with the SSCI Representative. Once the customer has committed to purchase from SSCI and, if the drawings require revisions, the Final Approval Drawings will be created and presented to the customer for their approval. Other Customer Requirements may be required before manufacturing time can begin.

CREATING THE PERFECT IMPERIAL MODULAR CABINET ARRANGEMENT TAKES JUST 5 EASY STEPS:

1 Measure your space.

Obtain overall width, height and depth of the available space in your facility where you plan to place your Imperial Cabinet Arrangement. To allow for the cabinet, the minimum depth of the area must be 18-in. (45.72cm) or 24-in. (60.96cm) plus the width of the widest cabinet door in the arrangement. This will allow cabinet doors to open fully. Make sure you have sufficient space in front of the cabinet arrangement for your staff to work efficiently.

2 Choose the type and style of the Imperial Cabinets in your Arrangement.

SSCI offers the most complete line of cabinetry available in the market.

3 Identify the Imperial Cabinet sizes you require.

A variety of sizes can be used in a single Arrangement. An idea of the area's use will help you select the sizes you need, for example; exam, treatment, pharmacy, laboratory, food preparation, reception and general storage.

4 Determine how your Cabinets will be arranged.

Take some time to consider the work procedures throughout your facility and arrange your cabinets for maximum efficiency

5 Choose the color or colors for your Cabinet Arrangement.

SSCI Imperial Modular Cabinetry are available in SSCI standard colors, SSCI optional colors, or a spectrum of customer-selected colors. See the Laminate Color pages in this Section.

Let us help you give your facility the professional appearance you deserve. An SSCI Representative will help you select cabinet styles and sizes, cabinet laminate and countertop surfaces to meet your unique needs, space requirements and budget.

Let SSCI assist your architect and to help plan the perfect facility.

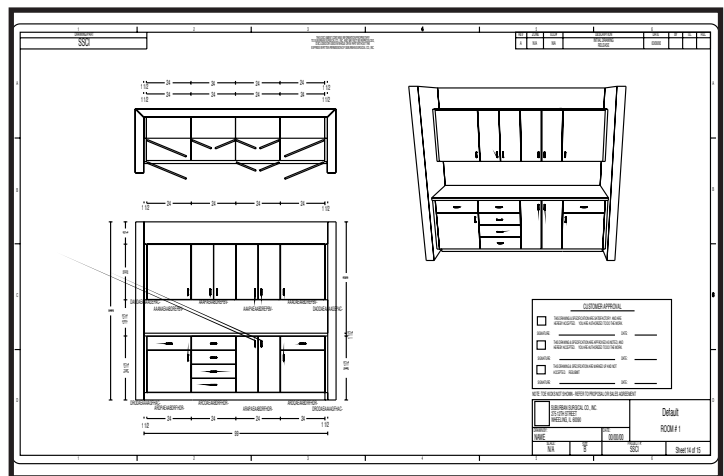

It all starts with a phone call to discuss your requirements. Then we will create a CAD-generated drawing of your cabinets, complete with all finishing compo-

nents you'll need to get a built-in look.

Our team of experienced designers will work with your measurements, cabinet type, style and budget to create the perfect Cabinet Arrangement for your requirements.

FOR EVERY CABINET ARRANGEMENT PURCHASE SSCI CREATES A DRAWING TO ENSURE CUSTOMER'S SATISFACTION

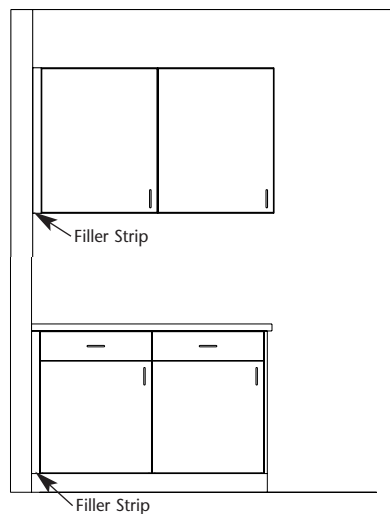

SSCI creates an Approval Drawing for each cabinet arrangement ordered. These detailed drawings of your cabinet arrangement list cabinet sizes, quantities, laminate choice and all appropriate finishing components and illustrate how the arrangement is to be assembled. If you choose to alter the positions of the cabinets in the arrangement or your choice of laminate, do not sign the existing Approval Drawing. Contact your SSCI representative, so that a new Approval Drawing can be created. All laminated products are non-stocked, made specifically per your specifications. Once SSCI has received the signed Approval Drawing the order is non-cancelable. In addition to other customer requirements, the Final Approval Drawings must be signed and received by SSCI prior to the beginning of manufacturing lead time.

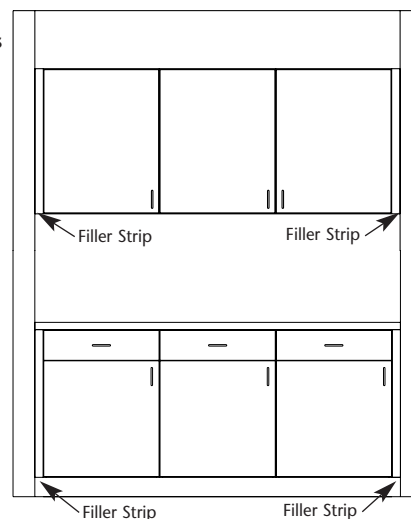

Use Of Finishing Components

FILLER STRIPS

Installation against 1 wall

Installation between 2 walls

USE OF FILLER STRIPS

Filler Strips are used when cabinet's ends abut to walls. Filler Strips are fitted to fill the space and scribed to compensate for wall's plumbness by the installer. They create clearance to prevent drawers, when being pulled out, from rubbing against the wall. Filler Strips are 'L'-shaped and both the face and the side are laminated with high-pressure laminate. Laminating both exposed surfaces of the 'L' shape allows for aligning the face of the Filler Strip flush with the face of the cabinet's doors and drawers to create a custom installation. Select the same laminate/color as chosen for the cabinets.

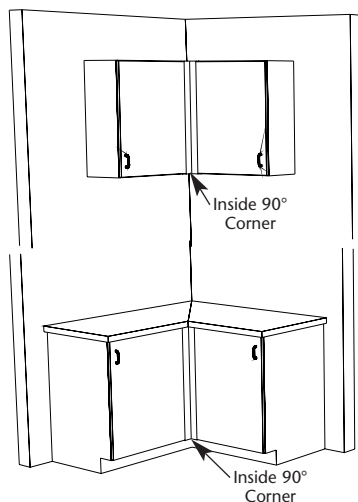

Installations Against One Wall:

A Filler Strip is used between the end of the cabinet and the abutting wall. The space between the end of the cabinet and the wall should be at least 1-in.

Installations Cabinets Between Two Walls:

Filler Strips are used on both ends of the cabinets, centering the cabinet installation between the two walls. The total width of the cabinets to be installed between two walls should be at least 2-in. less than the space between the two walls.

INSIDE 90° CORNERS

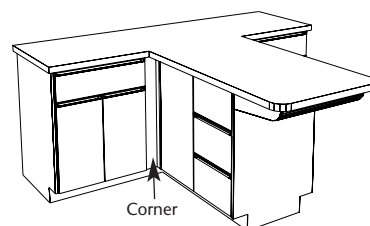

USE OF INSIDE 90° CORNERS

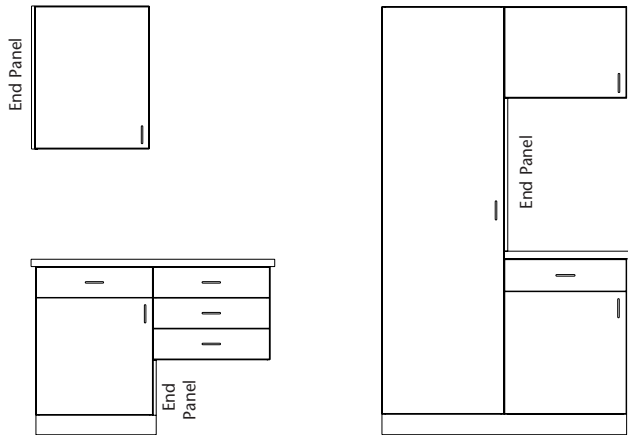

Inside Corners are used when cabinet's are installed on two walls that are 90° to each other and no corner cabinet is used. The Inside Corner is used to create clearance to prevent drawers, when being pulled out, and doors, when opening, from rubbing against the cabinet front installed at 90°. Inside 90° Corners are 'W'-shaped and both faces and both sides are laminated with high-pressure laminate. Laminating the faces and sides of 'W' shape allows for aligning the faces of the Inside 90° Corners flush with the faces of the cabinet's doors and drawers to create a custom installation. Select the same laminate/color as chosen for the cabinets.

USE OF CORNER FOR T-MOUNTING TREATMENT/PREP-PROCEDURE TABLES

Inside Corners are used when tables are abutted to floor-standing cabinets at a 90° angle. The Inside Corner is used to create clearance to prevent drawers, when being pulled out, and doors, when opening, from rubbing against the cabinet front installed at 90°. Inside 90° Corners are 'W'-shaped and both faces and both sides are laminated with high-pressure laminate. Laminating the faces and sides of 'W' shape allows for aligning the faces of the Inside 90° Corners flush with the faces of the cabinet's doors and drawers to create a custom installation. Select the same laminate/color as chosen for the cabinets.

END PANELS

USE OF END PANELS

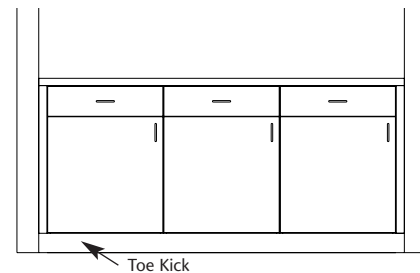

End Panels are used on the exposed ends of a cabinet to give the cabinet a finished appearance. End Panels are flat panels, both sides and the front edge are laminated with high-pressure laminate. Laminating both sides allows for aligning the edge of the End

Panel flush with the face of the cabinet's doors and drawers to create a custom installation. Select the same laminate/color as chosen for the cabinets.

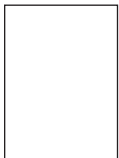

TOE KICKS

USE OF TOE KICK

Toe Kicks are used to finish the recessed toe space at the bottom of the cabinets, to give the cabinet installation a finished appearance. Toe Kicks are a strip, one side is laminated with high-pressure laminate. Select the same laminate/color as chosen for the cabinets.

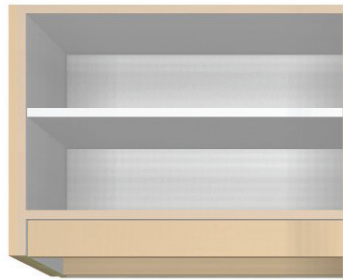

BACK PANELS

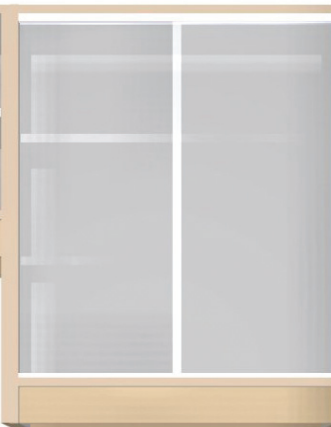

USE OF BACK PANELS

Back Panels are used on the exposed backs of a cabinet to give the cabinet a finished appearance. Back Panels are flat panels, one side and the top edge are laminated with high-pressure laminate. Select the same laminate/color as chosen for the cabinets.

Accessorize Your Cabinets with Pull-Out Trays:

To eliminate constant bending over to view the contents of Undercounter and Full Height Cabinets, replace the cupboard's existing adjustable shelf with Pull-out Trays. Our uniquely-designed rollers/slides ensure that the Pull-out moves quietly, smoothly and with little effort. Typically, two trays are installed in each cupboard; one at the bottom and one midway. Pull-out trays for laminated products are white to match the interior of the cupboard.
